Eye3 Series Metal Detectors

Equipped with cutting-edge technology, the Eye3 Metal Detector Series offers a range of capabilities that will revolutionize your metal detection experience. The remarkable Eye3 Metal Detector Series helps you discover ferromagnetic metals, secret passageways, rooms, cellars, and shelters. Through multiple sensors, the Eye3 Metal Detector Series cancels out disturbances, ensures accurate and reliable results, and uncovers hidden targets easily and precisely. The Eye3 Metal Detector Series is equipped with user-friendly software that allows users to choose from various scanning modes. Live scan mode on the Eye3 Metal Detector Series produces visually captivating charts like line and stream charts. Furthermore, the Eye3 Metal Detector Series offers users a comprehensive overview of the scanning area in 2D or 3D graphs, which provide information about the composition and distribution of metallic objects in the scanning area.

Technical Specifications:

Specifications	Value		
Operating Temperature Range	- 10 °C to + 50 °C		
Connecting type	Wireless, Bluetooth		
Weight	Eye3-D135 900 g.	Eye3-D369 950 g.	Eye3-D711 1000 g.
Battery type	Li-ion Rechargeable Internal Battery		
Battery Run Time	> 10 Hours		
Dimensions	110 x 12 cm		

Advantages:

- High detection depth range
- Adjustable sensitivity
- Gradiometry technique
- Easy to use Android interface
- Three different live charts
- 2D scan with adjustable dimensions
- Professional 3D visualizers (Android and Windows versions)
- Wireless communication

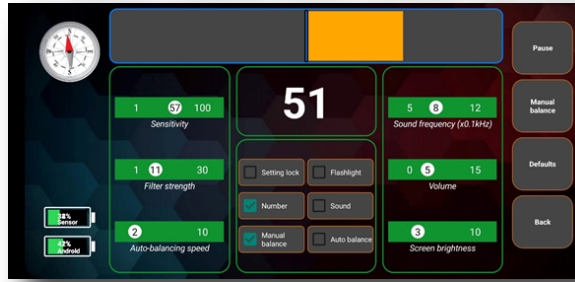

Comparison of Eye3 Series Metal Detectors

Feature	Eye3-D135	Eye3-D369	Eye3-D711
Sensitivity level	Medium	Medium	High
2D scan	NO	✓	✓
Hand vibration canceller	NO	NO	✓
Windows-based 3D visualizer	✓	✓	✓
